

## Roman Grossi

DevOps, Full-Stack developer

- Name: Roman Grossi
- Birthday: 16 February 1994
- Email: i@tobishua.com
- Now in: Russia, Saint Petersburg
- @Tobishua in all social networks

## Work experience

May 2018 - Present

### Umbrellio

Role: DevOps Engineer

Fintech.

- Installation and configuration of servers and software;
- Monitoring of equipment and services (Grafana + InfluxDB + Telegraf, Nagios);
- Setting up tools for monitoring;
- Optimize performance, troubleshoot problems, eliminate denial of service;
- Solving problems on security and scalability of systems;
- PostgreSQL like a master;
- Nginx like a ninja;
- CentOS like a boss :)

August 2017 - May 2018

### Playkot

Role: Ops Engineer

Playkot is a Russian game studio which makes games for social networks and mobile devices.

- Technical consultation of the company's employees;
- Making office IT better;
- Maintenance of game servers;
- TeamCity, Jira, Confluence, GitLab, etc. - install and configure;
- PPTP, L2TP servers;
- Grafana + Prometheus - install and configure.

February 2017 - August 2017

### Selectel

Role: System administrator

The largest Russian IaaS-provider.

Services: colocation, dedicated servers, cloud storage, virtual private cloud, content delivery network, etc.

- Technical consultation of the company's customers;
- Linux administration;
- Juniper and other network equipment administration;
- Network and infrastructure monitoring.

Question: Why did you work here after such a long break?

Answer: I quit to go on a round-the-world trip, and when I returned, I was called back.

January 2015 - October 2016

### Selectel

Role: System Engineer

Company description: See above!

- Monitoring of servers, network equipment and air-conditioning system (1 server room, 211 racks, ~6000 servers, ~500 units of networking equipment);
- Switching and laying optical and copper networks;
- Servers maintenance (Dell, IBM, Supermicro, etc.);
- In addition to the main work, I made front-end for the corporate time tracker system.
- I sprinkled my blood on the k-root dns (it's not a joke, I really cut myself on the edge of the case and a drop of my blood hit the motherboard.)

## Improvvy

Improvvy is my own side work, which I developed for a long time in my free time.

During this time I developed several large projects:

Working

### FullyStat

Role: DevOps Engineer, Full-stack developer (PHP, MySQL, Redis, Gearman, jQuery)

FullyStat is an awesome Telegram bot for chats and users analytics and displays nice charts. My first international project, which is used by people in more than 10 countries.

- More than 50000 users;
- More than 500 chats in monitoring;
- Several tens of thousands of queries per day.

Closed

### The MusicBot

Role: DevOps Engineer, Backend-developer (PHP, MySQL, Redis, Gearman)

The MusicBot is piracy! The bot can find and download any song for free.

- More than 20,000 users;
- More than 120,000 queries per day.

Unfortunately, the API service we used was closed, so I had to close the project.

Working

### FairTop

Role: DevOps Engineer, Full-Stack developer (PHP, Python, MySQL, Redis, Gearman, jQuery and more)

My first serious project. FairTop is Minecraft's servers rating and useful tools for server's owners.

- More than 1,000 game servers registered;
- More than 30,000 MAU;
- Around 300,000 page views in month.

HTML CSS Linux PHP MySQL Nginx Twig JavaScript jQuery Git Python Redis Docker Libvirt Ansible Terraform

TRAVELLING

I like travelling. And I try not to stay in one place for a long time.

HORSEBACK RIDING

Horses - amazing animals. Even though I rarely get to do it, but I love to ride.

COOKING

A tasty dish that I cooked myself - the best it can be!

UKE

My favorite musical instrument, which is everywhere with me.

CLIMBING

Climbing is something unusual and allows me to know my own limits.

YOGA

A healthy mind and a healthy body - the key to success.
